I have recently read your digest and regretted that I did not read it earlier. What attracted me in your journal is that it discusses pressing topics of the day, covers many subjects and presents them in a clear way. This makes it a useful publication for people who know little of the theory of scientific socialism.

SULEIMAN CONDE,
Guinea

I always carefully read your articles dealing with the struggle of the Soviet people for peace. The imperialists have arrogated to themselves the right to decide the destinies of millions of people and deal unilaterally with the problems of international peace. In fact, they are doing everything to unleash a war without realizing that it will spell their own end.

SOLOMON MULAT,
Ethiopia

Among the articles which I have read in your journal I would like to mention the one written by V. Burt and entitled "Well-Being under Socialism and Its Aspects" published in issue No. 10 last year. I would appreciate seeing more materials of this kind as they clearly and convincingly show the real living standards of common people under socialism.

K. SHERVIN,
Ghana

Being fond of your country and the Soviet people I have begun to study the Russian language. I use every opportunity to practice Russian with the Soviet specialists working in our town. One of them, Vladimir, told me that he was a diesel operator and, at the same time, a "nastavnik" (tutor). I was interested, but could not understand all he told me about his tutorship because my Russian is still very poor. Could you explain to me the meaning of this?

JACQUES MBEZE,
the Congo
