ACKNOWLEDGEMENTS

The Exhibition, Architectural Design for Cultural Adaptations in Black and African Civilization, was commissioned by the International Secretariat late in August 1976 for the 2nd World Black and African Festival of Arts and Culture. As Consultant to the International Secretariat for the Exhibition, it has been a great pleasure to prepare and design the exhibition and catalogue. Without the continuing encouragement of the Secretariat at both the Exhibition division level and at the highest level, this exhibition would never have been possible.

My sincere thanks go to the many people too numerous to mention here who in many ways over the years have contributed immensely to the success of this project. My initial study of West African human settlements was generously funded by Farfield Foundation and Ford Foundation. Special mention must be made of my consultants: Susan B. Aradeon on research and catalogue; David H. Dale, the graphic artist for the exquisite drawings on plexiglass and graphics; T. Jawando, my special assistant; Naigzy Gebremehdin on architecture in Ethiopia and Katia Salomon on photography in Paris. The full list of the collaborating students from the University of Lagos who enlarged the architectural drawings, built the models and acted as research assistants can be found on the back page.

My thanks also go to the University authorities for their permission and to my faculty and my students for the understanding shown. My special thanks to Goke Adeniji, Reference Librarian, for his indispensable assistance. The credits for photographs and architectural drawings, some of which were generously donated, are at the back of this catalogue.

David Aradeon, Registered Architect
Senior Lecturer, University of Lagos
